PROFILE

Software developer with ~3 years of coding experience specializing in .NET and C# backend development. Strong foundation in object-oriented programming, database design, and frontend fundamentals. Focused on writing clean, maintainable code and building scalable, reliable applications, including web APIs and desktop solutions

PROFESSIONAL EXPERIENCE

Web Design & Development Project, E-Library Platform (NTI Web designer project July 2025)

- Designed and developed a digital library web platform for browsing, searching, and managing large collections of books and resources.
- Implemented advanced search functionality and category filtering to improve content discovery. Built a responsive and user-friendly interface following modern UI/UX principles.
- Delivered a platform that provides efficient content management and seamless access to digital resources.

Smart Booking Application (Digital Egypt Pioneers Initiative (DEPI) - Full Stack .NET project November 2025-July 2026)

- Developed a full-stack booking system to manage reservations and real-time availability. Built the backend using .NET Core and Entity Framework, implementing RESTful APIs and database integration. Implemented user authentication and secure data handling for booking operations. Designed a responsive frontend interface enabling smooth reservation and scheduling workflows.
- Created a scalable solution that streamlines booking management and improves user experience.

EDUCATION

B.Sc. Computer Science, 2023 – 2027
Higher Institute of Computers and Information Technology-Shorouk academy

Language

Arabic Native	English fluent
-------------------------	--------------------------

Technical Skills

Backend Development

C#, .NET / .NET Core, ASP.NET Core, RESTful API Development, Entity Framework, LINQ

Databases

SQL Server, MySQL, Database Design, Database Migrations

Professional Skills

- Problem Solving
- Clean & Maintainable Code
- Technical Documentation
- Team Collaboration
- Time Management
